VARIABLE SPEED DRIVE

Overview

Description

The AC20 Advanced Compact Drive is a highly featured yet economical solution to general purpose motor control applications. AC20 provides speed or torque control in the power range 1.5 kW to 180 kW. Its compact dimensions house many features normally only associated with system drives, including sensorless vector mode for control of Permanent Magnet (PMAC) and AC induction motors, encoder feedback and IO expansion option cards, Safe Torque Off and an onboard Ethernet port that supports major industrial Ethernet protocols.

AC20 provides the perfect solution for OEM machine builders looking for a compact, cost-effective drive without compromising on performance.

Features

Simplicity

AC20 is designed to reduce the time and effort required to select, install, set up and commission.

Two variants of option card are available, and both are user installable/retrofitable. Minimal wiring requirements with two easily accessed terminal rails and removable power cable earthing brackets make AC20 fast and simple to install. All AC20 come with a high quantity of user configurable IO and a user disconnectable C3 EMC filter as standard.

Programming and commissioning is made simple through its easy to use integrated keypad and the DSELite programming tool.

Reliability

Proven technology and manufacturing techniques ensure AC20 has been engineered and built to deliver consistently outstanding levels of performance day in, day out - ensuring maximum uptime and productivity.

Thanks to its conformally coated PCBs, AC20 is built to withstand C3 environments.

Compatibility

AC20 has been designed with system compatibility in mind. The compact footprint allows installation into existing spaces, while the IO count has been chosen to allow maximum possible flexibility. The internal block diagram is fully featured to enable replacement of legacy Parker inverters, and the onboard Ethernet communications protocols aid integration into wider systems. Retrofittable, plug-in communications cards cover all popular protocols and are simple to configure.

Technical Characteristics

Power Supply	220 ... 240 VAC $\pm 10\%$ Single Phase 220 ... 240 VAC $\pm 10\%$ Three Phase 380 ... 480 VAC $\pm 10\%$ Three Phase
Input Frequency	50/60 Hz $\pm 10\%$
Power Range	1.5...180 kW Heavy Duty (HD)
Overload	150% for 60 sec.
Output Frequency	0.5 - 590 Hz
Safe Torque Off (STO)	SIL2, PLd
Operating Temperature	0...40 °C (derate possible up to 45°C)*
Altitude	0-1000m (derate 1% per 100m up to 2000m max.)

* Without communications option fitted

Overview

µSD Card Slot

For application cloning and firmware updates in the field

Built-in Display Keypad

Operate the drive and see real time diagnostic feedback through the built-in 2-line alphanumeric display

Standard Ethernet Port

Modbus TCP/IP, ProfinetIO & Ethernet IP as standard. Access the drive webpage or program the drive through the popular and intuitive DSElite configuration tool

User fittable Option Cards

- Encoder Feedback card
- GPIO card

Both are compatible in each option slot & two identical cards can be fitted simultaneously

6901 Keypad Support:

Connect an optional remote 6901 keypad to the RJ11 port.

Dedicated Motor Thermistor Input

PTC Motor Thermistor feedback connection as standard

Safe Torque Off

Independently certified STO to SIL2, PLd as standard.

Complies to:

- EN ISO13849-1:2015
- EN 61800-5-2:2017
- EN 61508

Power Cable Shielding Bracket (not shown)

Frames 2-5 fitted with a cable shielding and support bracket as standard

User I/O

Extensive analogue and digital I/O for application flexibility

Additional Communications Options

- CANopen
- EtherCAT
- Ethernet IP
- Profibus DVP-1
- ProfiNet IO
- RS485 Modbus RTU slave

Standards & Compliance

The product is certified to the latest international standards:

Europe:

- Low Voltage Directive: 2014/35/EU
- EMC Directive: 2014/30/EU
- Machinery Directive: 2006/42/EC
- EN61800-5-1:2007+A11;2021
- EN61800-3:2018
- IE 2 Compliant

North America & Canada:

- UL61800-5-1
- CSA22.2#274-17

APPLICATIONS

AC20 provides a no-fuss approach to general purpose industrial motor control applications across a wide range of industries, giving users the benefits of the inherent energy-saving properties of using a variable speed drive, as well as the improved reliability and extended service life benefits associated with smoother starting and stopping of regularly cycling loads.

Typical applications for AC20 include...

- Conveyor
- Centrifuge
- Fans
- Mixers
- Packaging Machines
- Textile Machines
- Strapping Machines
- Labelling Machines
- Industrial Washing Machines
- Machine Tool Spindles
- Roller Doors

Conveyors

Centrifuges

Fans

Mixers

Packaging Machines

Textile Machines

SOFTWARE

Parker Drive System Explorer (DSE Lite)

Parker drive configuration software Drive System

Explorer (DSE) Lite is an easy to use drive configuration software package, designed to make programming your application as simple as possible without compromising on functionality.

DSE Lite is based around a straightforward block programming and an intuitive user interface which supports user-defined configurations and offers real-time monitoring and charting. DSE Lite allows the user to create, parameterize and configure user defined applications as well as parameterize and connect fixed Motor Control blocks with 70 user functions and up to 200 'links'

Thanks to the on-line help and pre-configured macro templates, users can achieve the optimum drive configuration without the need to navigate through complicated parameter menus.

DSE Lite for AC20 uses a standard Ethernet connection between PC and inverter, so no special lead is required.

Features new to the AC20 include:

- Ethernet connectivity
- Network scan feature
- Drive LED identification
- Firmware installs over Ethernet
- Ability to save a project to on-board Flash memory
- Compatibility with the AC30 Series PDD scope feature.
- Power 'on the bench' for programming

It is available free of charge to download from www.parker.com.

ACCESSORIES AND OPTIONS

6901 Remote Mounting Keypad

The popular 6901 remote mounting keypad can be mounted away from the drive, such as on the door of an electrical enclosure. This IP20 products allows users to configure, operate and monitor the drive without having to access the drive directly.

The remote keypad provides an alternative to the drive mounted keypad, offering the same functionality, but can be connected to the drive via a 1.5 m cable plugged into a RJ11 port on the drive.

Order Code	Description
6901-00-G	6901 DisplayKeypad
6052-00-G	6901 remote mounting kit

Option Slots

The AC20 features three option slots. All options are user installable and are ordered separately. Two option slots will accept either a speed feedback option or general-purpose IO expansion module, with a third option slot dedicated to communications option modules.

OPTION CARDS

General Purpose I/O (GPIO) Option Card

Description:

The general purpose I/O (GPIO) option module offers users the opportunity to expand the drives standard I/O capability, allowing more complex motor control solutions to be implemented.

The option can be fitted in either slot 1 or 2, and two options can be fitted at the same time to maximize the IO compliment. For example, two fitted IO options will give an additional 4 analogue inputs.

2004-IO-00	GPIO Option
Analogue inputs	2x Analogue inputs ($\pm 10V$, 0-10V)
Analogue output	1x Analogue outputs ($\pm 10V$, 0-10V)
Digital I/O	Digital Input/Output 1 (24V configurable)
Reference voltages	+/- 10V References

Terminal	Label		Description
	Slot 1	Slot 2	
AI3	AIN3	AIN5	Analogue input 3/5 ($\pm 10V$, 0-10V)
AI4	AIN4	AIN6	Analogue input 4/6 ($\pm 10V$, 0-10V)
AO4	AOUT4	AOUT5	Analogue output 4/5 ($\pm 10V$, 0-10V)
DX11	DIO11	DIO12	Digital I/O 11/12 (24V configurable)
+10V	+10V	+10V	+ 10V Reference voltage
-10V	-10V	-10V	- 10V Reference voltage
0V	0V	0V	0V Reference for analogue & digital I/O

Encoder Feedback Card

Description:

The HTTL pulse encoder feedback module allows an incremental encoder to be connected to the AC20, allowing users to take full advantage of closed-loop vector control.

The option can be fitted in either slot 1 or 2, and two identical options can be fitted at the same time, allowing for simple speed following applications.

2004-EN-00	Encoder Feedback Option
Maximum input frequency	250 kHz per channel
Input format	Quadrature
Output supply voltage	5V, 12V, 15V, 20V

Terminal	Label		Description
	Encoder 1	Encoder 2	
A	A	A	Channel A input
/A	/A	/A	Channel /A input
B	B	B	Channel B input
/B	/B	/B	Channel /B input
V+	V+	V+	Encoder supply +
V-	V-	V-	Encoder supply -
SCR	SCR	SCR	Cable screen

COMMUNICATION OPTION CARDS

The AC20 takes advantage of commonly available third-party communication modules, allowing communication over a range of popular protocols. Also included in the supported range are Ethernet IP and ProfiNet modules, for when two ports are required. Adding an Ethernet based option card is possible in addition to the onboard Modbus TCP/IP, ProfiNet or Ethernet IP port.

2003-CB-00	CANopen communication interface
Supported Protocols	DS301 V4.02
Communication Speed	10 k, 20 k, 50 k, 125 k, 250 k, 500 k, 1 Mbits/s or automatically detected
Max. number of devices	127
Supported Messages	SDO, PDO, NMT, SYNC

2003-EC-00	EtherCAT communication interface
Supported Protocols	CANopen over EtherCAT (CoE) DS301 compliant
Communication Speed	100 Mbits/s
Max. number of devices	65534
Supported Messages	SDO, PDO, NMT, SYNC

2003-IP-00	Ethernet IP communication interface
Supported Protocols	Ethernet IP
Communication Speed	10/100 Mbits/s full/half duplex
Max. number of devices	Virtually unlimited
Supported Messages	Up to 256 bytes of consumed data and 256 bytes of produced data, CIP parameter object support, Explicit messaging

2003-PB-00	PROFIBUS DP-V1 communication interface
Supported Protocols	PROFIBUS-DP; Demand data and Data exchange
Communication Speed	Up to 12 Mbits/s; automatically detected
Max. number of devices	32 per segment, 126 total
Supported Messages	Up to 152 bytes cyclic I/O, 68 bytes class 1 and 2 acyclic data, 152 bytes configuration data. GSD file provided

2003-RS-00	RS485 / Modbus RTU communication interface
Supported Protocols	Modbus RTU
Communication Speed	1200 to 115 200 bits/s
Max. number of devices	247
Supported Messages	Up to 256 bytes of cyclic I/O data in each direction

2003-PN-00	PROFINET I/O communication interface
Supported Protocols	PROFINET I/O generic device
Communication Speed	10/100 Mbits/s full/half duplex
Max. number of devices	Up to 128 submodules in total
Supported Messages	Up to 256 bytes of cyclic I/O in data in each direction

BRAKING RESISTOR

During deceleration, or with an over-hauling load, the motor acts as a generator. Energy flows back from the motor into the DC link capacitors within the drive, causing their voltage to rise. If this voltage exceeds a maximum value, the drive will trip to protect the capacitors and internal power devices. The amount of energy that can be absorbed by the capacitors can vary between different applications causing the drive to trip on overvolts. To increase the drive's dynamic braking capability, high power resistor(s), connected across the DC link, allow the dissipation of this excess energy for short term stoppage or braking.

Brake resistor selection

Brake resistor assemblies must be rated to absorb both peak braking power during deceleration and the average power over the complete cycle.

$$\text{Peak braking power} = \frac{0.0055J \times (n_1^2 - n_2^2) \text{ (W)}}{t_b}$$

$$\text{Average braking power } P_{av} = \frac{P_{pk} \times t_b}{t_c}$$

J: total inertia [kgm²]

n₁: initial speed [min⁻¹]

n₂: final speed [min⁻¹]

t_b: braking time [s]

t_c: cycle time [s]

Model	Impedance [Ω]	Nom. Power [W]	Dimensions [mm]

Overload 5 s: 500 %

Overload 3 s: 833 %

Overload 1 s: 2500 %

EMC Filter

AC20 are supplied as standard with an EMC filter fitted that meets the requirements of a class C3 environment.

For class C2 or C1 environments, an additional external filter may be required.

An internal wire link may be easily removed to disconnect the Y capacitors for those installations where earth currents are undesirable.
