

SICME ORANGE1

D.C. Motors for industrial Applications

Serie RA
Taglie 80 - 800 / da 0.5 a 2500 kW

C-RA80-800-IE-17-R01

EN

A dynamic, strong and ambitious Group

Orange1 Holding is an international renown Group, one of the most important European manufacturers of single-phase and three-phase asynchronous electric motors. It has an annual capacity of more than 1 million motors and 5 million electric stators with an annual turnover of approx 235 million euro and more than 1600 workers in 15 production facilities. The group, established in 1971 by Leone Donazzan, chaired today by his son Armando Donazzan, is strongly focused on technological innovation, performance and customization to meet individual clients requirements.

WE ARE PASSION

We look to the future,
to anticipate customers' needs.

Soul, Heart and Brain striving to create real value to our customers and to ourselves. Our principal motto is "We Are Passion" in order to win the most passionate challenge: anticipate customers' needs. With its mission the company try to create real value to the customers by considering their perspectives and realizing their expectations. Orange1 Holding defines itself as a "Manufacturer of Solutions". How to ride through time? Orange1 tries to move with the time acting without hesitation in order to be constantly at the cutting edge of development in its sector.

RESEARCH & DEVELOPMENT

The R&D Department
is a strategic advantage for the Group.

The design and development of new products is a crucial factor in such a changing industrial society considering the technological innovations and the competitors. Corporate strategies and choices are extensive technological research, desire to emerge and a high level of originality. Orange1 products suit customers and market needs despite the high level of personalization. The launch of a new product is the conclusion of a thorough market analysis. By focusing on the flexibility and efficiency Orange1 Group responds to customers' demands designing customized models for special applications. This has allowed a notable technological and production development.

SICME|ORANGE1

Sicme Motori S.r.l., founded in 1967, produces AC motors, variable speed and high quality DC motors and it represents a benchmark of excellence for its technology providing the best economical solutions for many different applications. Since 2002 it has been cooperating actively with the Institute of Electrical Engineering of the Polytechnic of Turin and it has been one of the world's largest producers of wind generators. In 2008, it has developed motors with ASR technology, the most revolutionary type of electric machine in the world, and in 2014 developed an innovative range of synchronous reluctance motors IE4 with a specific patent.

A company with a 40 years history, well-known around the world for the high quality and product technology, it produces Asynchronous motors up to 3700 Kw, Synchronous motors up to 2700 Kw, Hydroelectric Generators up to 3000 Kw, Mini-Wind generators up to 200 Kw and Wind Turbines up to 5000 Kw. And among many other projects has developed and built the motor wheels for the Rover which landed on Mars.

Sicme Motori is also one of the European Leaders for variable speed applications, presents the serie of three-phase synchronous reluctance motors, which are designed for and can only be operated by a frequency converter (inverter).

In 2020 Sicme Motori was renamed Sicme-Orange1.

General Description

D.C. Motors for Industrial Applications - RA series

This catalogue gives the technical information about D.C. motors for industrial applications RA Series, frames 80-800 mm shaft height.

| Designation of the motors (example) | |
|-------------------------------------|-----------------------------------------|
| RA | Motor series |
| 280 | Shaft height (mm) |
| K | K with compensating winding – N without |
| M | Core length |
| 6 | Selection code for length definition |
| PVA | Type of cooling |
| B3 | Mounting arrangement |

Validity of the catalogue

Information given in this catalogue is of a purely indicative nature and may be changed without prior notice. The producer shall not be held responsible if the products illustrated herein are used outside the limits of the specifications given.

Reserved property

This document and its contents are the sole property of ORANGE1. They may not be reproduced either wholly or in part, nor shown, referred to or in any way transmitted to other persons without express written permission by ORANGE1

Warranty

All the products described are warranted according to our General Terms of Supply. The duration of the warranty is one year from the date of delivery or of notice that goods are ready, unless agreed otherwise. Warranty and sales support are regulated by instructions given by our General Terms of Supply and our ISO9001-2015 Quality System.

Motors and generators

All machines can in general be used both as motors and as d.c. generators. Performance ratings given in the technical catalogues refer to use as variable speed motors connected to three-phase, fully-controlled bridge (6 or 12 thyristors). The performance ratings concerning use as generator will be given upon request.

Clockwise and counter-clockwise rotation

All RA machines are suitable for either clockwise or counter-clockwise rotation without adjustment (as the brushes are radial), and they are generally tuned in the Test Room for this operating condition. In special cases, when the direction of rotation is defined, upon request, Test Room tuning can be carried out for one direction only.

CSA Certification

RA machines with framesizes 200 and higher are approved and certified as meeting the Standards of the Canadian Standards Association, and they are therefore allowed to bear the CSA brand. The certification number is LR77401.

Constructional Features

IEC 60034-1 Standards

Fully laminated frame

Insulation class F up to framesize 180

Insulation class H from framesize 200 and higher

Frames 80, 90, 100 are 2 poles machines, others (larger frames) are 4 poles

Frames 80 to 160 have no compensating winding

Frame 180 has compensated winding. Frames 200 and larger ones have compensating winding.

Frames 200 and 225 are available also without compensating windings

Balancing A degree (ISO2373) with half key

Monolithic brush up to framesize 180

Twin brushes from framesize 200 and higher

Constant pressure brush-holders

Terminal box RHS viewed from DE for all sizes, but 80, 90 and 100 which have it on top

Vacuum Pressure Impregnation

Bearings

Bearings normally specified for the machines in this catalogue are rolling bearings, ball or roller. All bearings for the motors with frame-sizes 132 and bigger have oversized clearance C3. DE ball bearings are available for direct coupling without (with very limited) radial load.

Frames 80-180

Standard arrangement uses ball bearings on both DE and NDE, grease lubricated for "life", totally shielded on both sides (2Z type).

Frame 200

Standard arrangement uses ball bearings on both DE and NDE, grease lubricated, with ball nipple and drainage of used grease, single shield (Z type).

DE roller bearings are available for coupling with pulley and belt with high radial load.

Frames 225-800

Standard arrangement uses ball bearing on NDE and roller bearing on DE, grease lubricated, with ball nipple and drainage of used grease.

The recommended lubrication intervals and the amount of grease to be used are given on the data plate. To define the lubrication programme, complete grease changing and the replacement of the bearings, please act in strict compliance with the Instructions for Installation, Use and Maintenance.

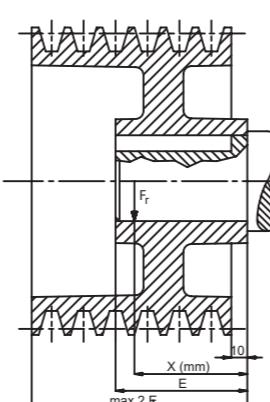

| Framesize | DE bearing | | NDE bearing | |
|-----------|--------------|----------------|-------------|------------|
| | Ball bearing | Roller bearing | Type | |
| 80 | 6305 2Z | NU305 | Ball | 6305 2Z |
| 90 | 6206 2Z | NU 206 | Ball | 6305 2Z |
| 100 | 6307 2Z | NU 307 | Ball | 6305 2Z |
| 112 | 6308 2Z | NU 308 | Ball | 6305 2Z |

| 280 | On request | NU2220-C3 | Ball | 6318-C3 |
| 315 | On request | NU321-C3 | Ball | 6321-C3 |
| 355 | On request | NU324-C3 | Ball | 6324-C3 |
| 400 | On request | NU228-C3 | Ball | 6228-C3 |
| 450KRS-S | On request | NU230-C3 | Ball | 6230-C3 |
| 450KSM-X | On request | NU232-C3 | Ball | 6232-C3 |

NOTE: For larger motors, please ask to our sales organiz.

Maximum admissible radial loads

We report here below the maximum radial load for the motors in this catalogue, evaluated for bearings lasting 20,000 hours and the stack length "P" for the motors frames 80 to 180 and "L" for the bigger framesizes. For other conditions, please contact our sales force.

The formula for the evaluation of these loads is here below, for which calculation the torque is required. It can be found in the section about performance of the motors.

$$Fr = 2040 \times \frac{C}{D} \times k$$

where:

Fr radial load in [N]

C motor torque in [Nm]

D pulley diameter in [mm]

k tensile factor specified by pulley manufacturer and corresponding about to:

k=1 for toothed belts

k=2.3 for trapezoidal belts

k=3.8 for flat belts

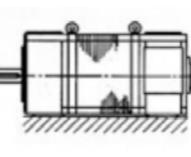

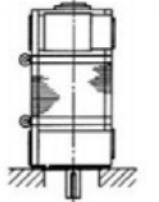

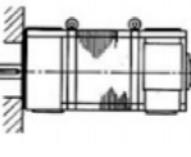

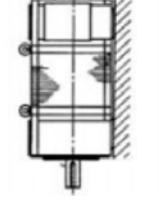

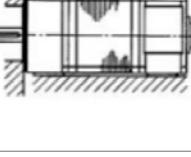

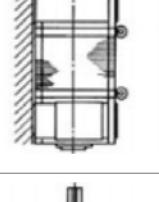

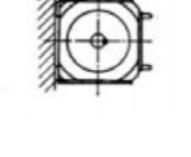

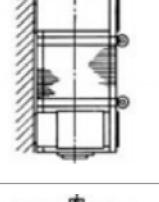

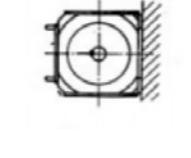

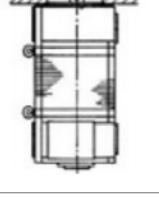

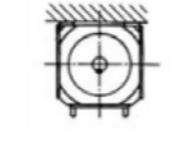

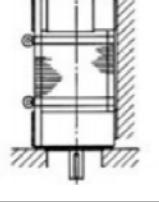

| Frame size | X (mm) | Speed (rpm) | | | | | | | |
|------------|-----------|-------------|-------|-------|-------|-------|-------|-------|------|
| | | 600 | 1000 | 1200 | 1500 | 2000 | 2500 | 3000 | 3500 |
| 80 | 20 | 1490 | 1490 | 1490 | 1370 | 1200 | 1100 | 1040 | 960 |

Forms of constructions and mounting arrangements IM

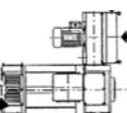

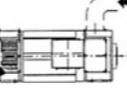

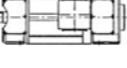

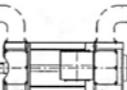

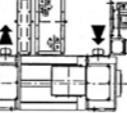

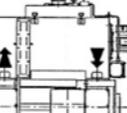

The standard solution is IM 1001 mounting form (B3 according to UNEL 05513). Most of the forms of construction and mounting IM described in IEC Standards 60034-7 are available; following table shows the most common ones. For other forms of construction, please ask our sales. Second shaft end is also available on request (in this case the last number is 2: example IM1002).

| UNEL 05513 | IEC 34-7 | Schematic outline | UNEL 05513 | IEC 34-7 | Schematic outline |
|---------------|-------------|---------------------------------------------------------------------------------------|---------------|-------------|---------------------------------------------------------------------------------------|
| B3 | IM 1001 |  | V1 | IM 3011 |  |
| B5 | IM 3001 |  | V5 | IM 1011 |  |
| B35 | IM 2001 |  | V35 | IM 2031 |  |
| B6 | IM 1051 |  | V6 | IM 1031 |  |
| B7 | IM 1061 |  | V3 | IM 3031 |  |
| B8 | IM 1071 |  | V15 | IM 2011 |  |

It is assumed that the environment is benign, thus:
dry, i.e. with relative humidity of the air below 75%. However, an excessively dry atmosphere (below 20% relative humidity) can cause commutating difficulty (excessive brush wear).
clean, i.e. without appreciable quantities of dust and dirt in general, suspended in the air.
free of chemical agents, i.e. without concentrations of gas or vapours that could chemically harm the copper, iron, aluminium, paints and insulation.
Our machines can also be installed in difficult environments (damp, dusty, chemically harmful, etc.) but in this case the degree of protection, method of cooling and possibly the choice of materials must be agreed upon previously.
All RA machines may be installed in environments with temperature down to -15°C and stored in environments with temperature down to -30°C .

Cooling methods IC and degrees of protection IP

RA motors can be supplied with various IC cooling methods (according to IEC 60034-6), with the IP degrees of protection (according to IEC Std. 60034-5). The different versions indicated by a specific code.

| IP | IC | Description | Code |
|----------------|-----|------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| 23 | 06 | Forced ventilation by fitted fan. Suction exhaust to the local atmosphere |  PVA |
| | 16 | Forced ventilation by fitted fan, with ducted air inlet and outlet vent to local atmosphere |  BPVA |
| | 17 | Ventilation by external system with ducted air inlet and outlet vent to local atmosphere |  BCA |
| 44 54 55 | 410 | Totally enclosed not ventilated machine |  CNV |
| | 36 | Force ventilation by integral system with air inlet and outlet ducts |  BPVAB |
| | 37 | Ventilation by external system with air inlet and outlet ducts |  CBA |
| | 86W | Assisted ventilation in closed cycle with air-water heat exchanger (for frames 200-800 only) |  CBARH |
| | 666 | Assisted ventilation in closed cycle with air-air heat exchanger (for frames 200-800 only) |  CBARO |

Machines with IP54 and IP55 degree of protection are suitable for outdoor installation only if under a shed or special cover

Balancing and vibrations

All the machines in this catalogue are balanced according to IEC 60034-14 class A. Balancing is carried out with the half key (therefore the half-coupling must be balanced with half key). Machines with special balancing (class B) are supplied upon request. Limits of vibration severity are given in the following table (tolerance $\pm 10\%$). Tests are carried out with the method of free suspension or with motors on rubber.

| Vibration Grade | Shaft Height (mm) | $56 \leq H \leq 132$ | | $H \leq 132$ | |
|-----------------|-------------------|----------------------|--------------------------------|-----------------|--------------|
| | | Mounting | Displacement (μm) | Velocity (mm/s) | Displacement |
| A | Free Suspension | 45 | 2,8 | 45 | 2,8 |
| | Rigid Mounting | - | - | 37 | 2,3 2,8 |
| B | Free Suspension | 18 | 1,1 | 29 | 1,8 |
| | Rigid Mounting | - | - | 24 | 1,5 1,8 |

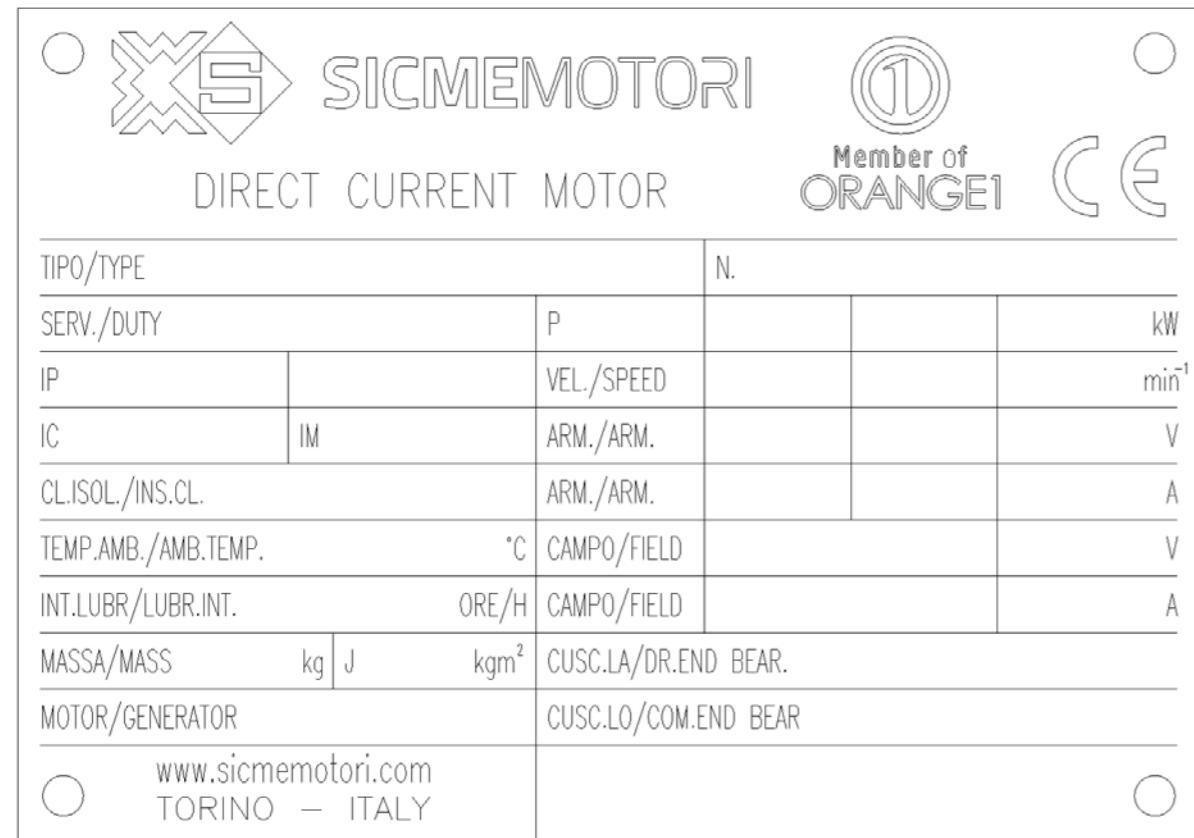

Painting

We have standardized certain painting cycles, which should be chosen considering the machine operating environment. Any other cycles may be defined in agreement with the Customer when ordering. The final standard colour is green RAL6004; other colours are available upon prior agreement when ordering.

| Cycle | Environment | Application |
|------------------------------------------------------------|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 (standard) | Indoor, dry, clean, not aggressive | degreasing with spray solvent synthetic finishing coat |
| 2 (anticorrosive) | Damp-salty, tropical, sea, near sea | degreasing with spray solvent epoxy coat painting 1 coat of enamel semi-gloss finishing coat minimum thickness 90 micron |
| 3 (anticorrosive special for aggressive environment) | Chemically aggressive, naval | degreasing with shotblasting 2 layers of epoxy coat painting 2 layers of enamel semi-gloss finishing coat minimum thickness 130 micron |
| 4 (special) | | Customized |

Main data plate

Main data plate is in stainless steel and it is solidly riveted to the motor frame.
Standard languages are Italian/English. Nameplate is according to IEC 60034-8.

Meaning of the abbreviations

| | |
|----------------------|------------------------------------------------------------|
| TYPE | motor type (please refer to the designation of the motors) |
| N | serial number |
| P | nominal power |
| SPEED | speed |
| ARM [V] | armature voltage |
| ARM [A] | armature current |
| FIELD [V] | field voltage |
| FIELD [A] | field current |
| MASS | motor weight |
| J [kgm²] | rotor moment of inertia |
| DUTY | duty cycle |
| IP | degree of protection |
| IC | cooling method |
| IM | form of construction |
| INS.CL | insulation class |
| DR.END BEAR. | drive end bearing |
| COM.END BEAR. | non drive end bearing |

Options and accessories for IC86W cooling (air-water)
and for IC666 cooling (air-air): please ask to our sales organization

Performance data

Conditions of validity of data contained in the performance tables shown in next pages are the following:

Type of cooling IC06 - IC16 - IC17 - IC36 - IC37 - (IC86W where applicable)

Maximum ambient temperature 40 °C

Maximum altitude 1000 m.a.s.l.

Supply from three phase fully controlled bridge (max form factor of armature current 1,05)

Insulation and temperature rise class F for framesizes 80-180 , class H 200-800

Duty S1 (continuous duty)

Standard overloads

Separate excitation

De-rating coefficient for conditions different than the above ones

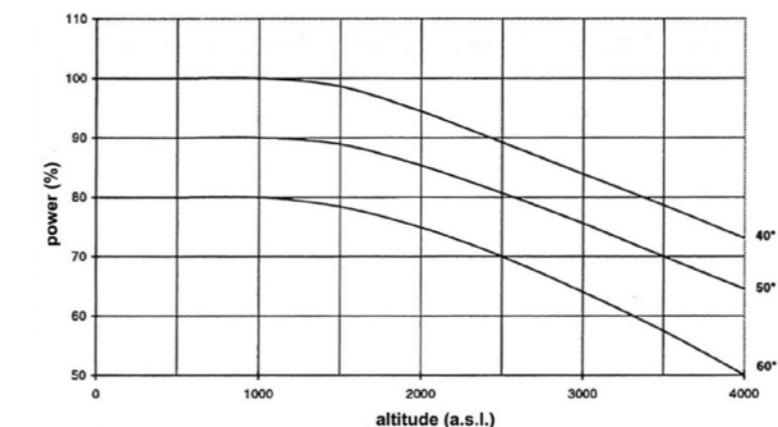

These are the coefficients that need to be used to bring the power ratings (and speed) required by the application to values compatible with the power and speed data given in this catalogue, when the type of service, ventilation, environment temperature and overtemperature differ from the standard ones above indicated. The various coefficients must be multiplied together when contemporaneous situations occur, obtaining two overall coefficients:

coefficient Kp referring to the power;

coefficient Kn referring to the speed.

To select a frame size suitable for required power/speed, the power rating to be found in this catalogue must be divided by Kp and the speed rating must be multiplied by Kn.

De-rating coefficient for different ambient temperature or altitude a.s.l.

When ambient temperature is > 60°C and/or altitude is > 4000 m.a.s.l., please ask to our sales organiz.

Overload capacity

| | Tmax | I max | Duration |
|--------------------------|--------|------------|------------------------------|
| IEC 60034-1 | 1,6 Tn | Not stated | 1' occasional |
| Compensated machines | 1,7 Tn | 1,8 In | 15" every 5' or 1' every 20' |
| NOT compensated machines | 1,6 Tn | 1,8 In | 15" every 5' or 1' every 20' |

Standstill

| Corrente/Current % (*) | Durata/Duration |
|------------------------|-----------------|
| 200 | 10 s |
| 100 | 30 s |
| 50 | 90 s |
| 20 | 10 min |
| 10 | Continuous |

(*) respect to the rated current

Current gradient

Motors are suitable for dynamic load dl/dt up to 200 In/s.

De-rating Coefficient for IC666 and IC610 cooling methods

| IC | Code | Kp | Kn |
|-----|-------|------|------|
| 666 | CBARO | 0.77 | 0.86 |
| 610 | CNVC | 0.28 | 0.67 |

Applicable to motors framesizes 200 and above: de-rating coefficients for temperature rise different than class H

Coefficient for different temperature rise

| Delta T | Kp | Kn |
|------------------|------|------|
| Class H (125 °C) | 1 | 1 |
| Class F (105 °C) | 0.91 | 0.95 |
| Class B (80 °C) | 0.8 | 0.89 |

Important remark: The Purchaser is always responsible to declare the duty; in case duty is not declared, the producer assumes that duty S1 (continuous running duty) applies. When duty is different from S1, or when sudden accelerations/decelerations/overloads are required, please ask to our sales service.

Selection code for length definition

Selection codes are necessary to select the right motor length on drawing. Standard selection codes are shown on the performance tables. When de-rating coefficient are used, selection codes change as shown in the following table

For framesize 710 and 800 please ask to our sales organiz.

| Framesize | Motors with de-rating coefficients | | | |
|----------------------|------------------------------------|----------------|----------------------------------------------------|----------------|
| | Temperature rise class F | | Temperature rise class B IC610 and IC666 motors | |
| Compensated machines | Number of Winding | Selection code | Number of winding | Selection code |
| 80-90 | All | 1 | All | 1 |
| 100-160 | All | 2 | All | 2 |
| 180 | All | 3 | All | 3 |
| 200 | All | 4 | All | 4 |
| 225 | All | 5 | All | 5 |
| 250 | All | 5 | All | 5 |
| 280 | All | 6 | All | 6 |
| 315 | All | 8 6 | All | 6 |
| 355 | 42-44 45-54 | 7 6 | All | 6 |
| 400 | 42-45 46-54 | 7 6 | All | 6 |
| 450-630 | 41-44 45-58 | 8 6 | All | 6 |

Table for the choice of the motor

To select the correct motor, please detect it in the tables here below the torque and speed range according to your application. Thus, please check the technical tables ("technical catalogues") in the download area in our website: www.sicmemotori.com and www.orange1.eu.

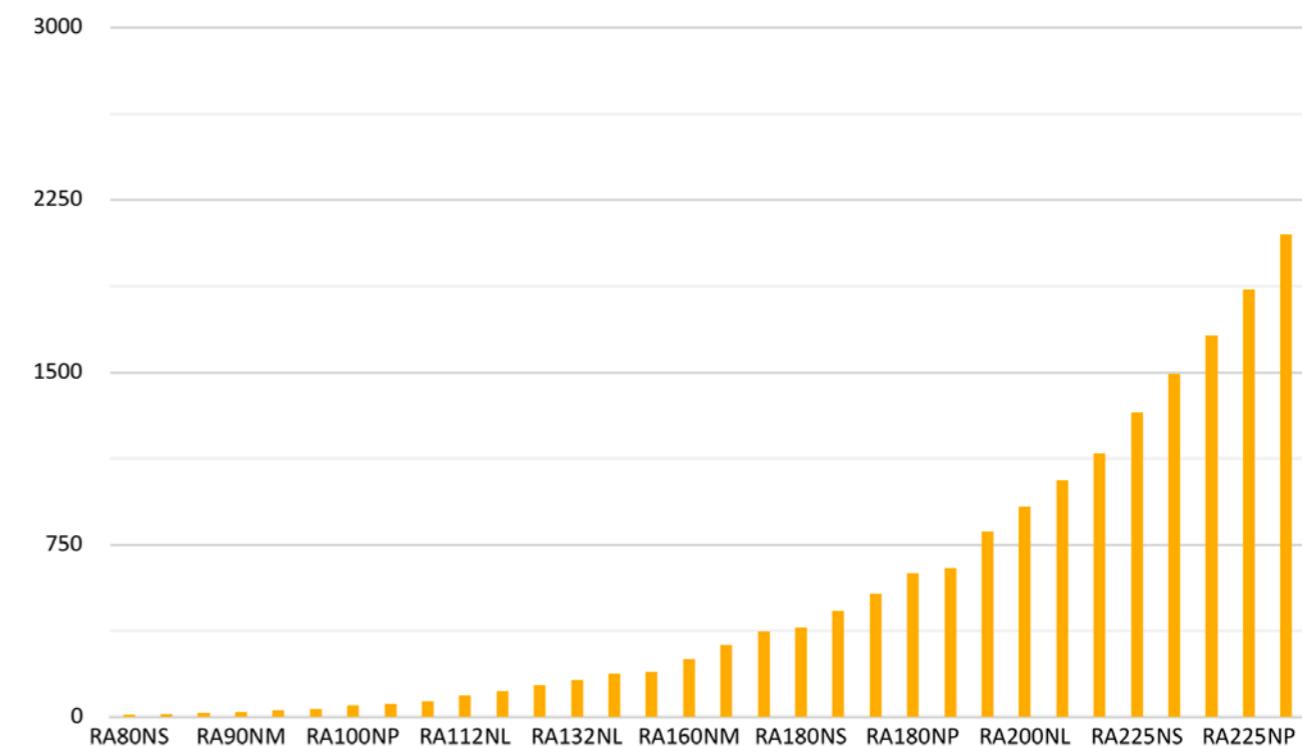

For framesize 500 to 800 please ask to our sales organiz.

| Motor | Standard voltage values on the catalogue [V] | | | | | | Min, max speed [rpm] | Torque (min, max) [Nm] |
